1. Purpose and Scope

The Health and Safety Policy of Poonawalla Fincorp Limited (PFL) is designed to protect the well-being of all individuals working within the company, ensuring a secure and supportive work environment. It reflects PFL's dedication to safe business practices and continuous enhancement of health, safety, and sustainable work environment.

This policy applies to all PFL Directors, officers, and employees across all functions and employment types at company premises. The policy is tailored to the specific needs of low-risk environments, focusing on eliminating workplace hazards and improving health and safety performance.

2. Objective

PFL aims for continuous improvement of health and safety, integrating these aspects into business decisions. We ensure compliance with relevant laws and provide a safe and healthy work environment. We prioritize the safety and well-being of all employees and establish clear health and safety performance targets. Our initiatives include:

- Ensure compliance with all relevant laws and regulations.
- Promote employee awareness through regular health and safety training.
- Facilitate routine health check-ups and access to medical services.
- Support flexible work arrangements and comprehensive employee benefits.

3. Governance and Risk Management

Our organization is committed to fostering a robust framework for governance and risk management, ensuring a safe and healthy environment for all employees. To ensure effective management of health and safety risks, we will conduct systematic inspections of our workplace to identify and manage risks, ensuring ongoing safety enhancements.

****Well-being:** Refers to the comprehensive health and quality of life of employees. It involves ensuring safe working conditions, promoting social welfare, and fostering environmental sustainability.*

****Low-risk environment:** Refers to work settings where potential hazards are minimal, typically involving office-based tasks with controlled conditions and reduced exposure to physical risks. These environments prioritize maintaining safety through regulatory compliance, preventative measures, and regular risk assessments.*

- Prioritize risk elimination; where not feasible, implement modifications to reduce risks.
- Carry out the check on fire safety measures, address issues promptly.

4. Responsibilities

1. Administration's Responsibility:

Admin plays a key role in ensuring a safe and healthy workplace. This involves compliance with regulations and fostering an environment that champions safety and continuous improvement.

- Allocate appropriate resources and enforce control measures to mitigate risks effectively.
- Cultivating a culture of ongoing improvement, ensuring employee well-being is a top priority.

2. Employees Responsibility:

Employees play a crucial role in maintaining workplace safety through adherence to established protocols and proactive engagement. They are encouraged to actively participate in safety initiatives and provide feedback for continual improvement.

- Familiarize themselves with health and safety policies and procedures to ensure informed participation.
- Report all accidents, incidents, and hazards promptly to relevant authorities.
- Attend organized health and safety training sessions to enhance their safety awareness and skills.
- Engage actively in safety awareness or feedback sessions to improve workplace safety practices.

5. Key Measures:

1. Emergency Procedures

- Develop and regularly update fire safety plans for company premises ensuring clear visibility to all employees.
- Establish first aid and medical assistance.
- Provide emergency contact information and communication protocols
- Conduct regular training & awareness for all employees to prepare for potential scenarios and improve response times.

2. Workplace Safety

- Provided ergonomic guidelines for computer workstations.
- Ensure workplace environmental safety
- Conducting health awareness programs.

3. Training and communications

- Training on safety & health
- Open channel of communication for safety concerns.

6. Pillars of health and safety

- **Regulatory Compliance:** Align health and safety practices with national and local safety regulations to ensure legal adherence and foster a safe work environment.
- **Employee Well-being:** Promote initiatives that support the health of employees, recognizing the impact of overall well-being on productivity and workplace safety.

- **Fire Safety:** Ensure consistent installation, inspection, and upkeep of fire safety equipment to maintain readiness.

7. Incident Management

PFL has established an incident management process to ensure proper handling of health and safety policy incidents involving employees, guaranteeing necessary medical attention.

1. **Immediate Response:** In case of medical emergencies beyond first aid, local medical arrangements to be sought for,
2. **Reporting:** Incidents are to be reported by the respective branch SPOC / branch manager to the committee concerned.
3. **Investigation:** The Head of Administration or a designated team member will initiate an investigation within 7 working days.
4. **Corrective Actions:** Implement agreed corrective actions and inform the manager, employee, and senior management.
5. **Risk Review:** Review and assess risk mitigation actions after the investigation during the subsequent office inspection.

8. Implementation and Monitoring

The implementation and monitoring of PFL's health and safety policy are overseen by the Chief Human Resources Officer (CHRO) and respective Department Concerned. They are responsible for ensuring that all safety measures are effectively integrated into daily operations and comply with regulatory standards-

9. Policy Review and Updates

This policy will undergo an review once in two years. Following this review, any necessary updates will be implemented. Once approved and verified by management or the board, changes will be communicated to employees.
